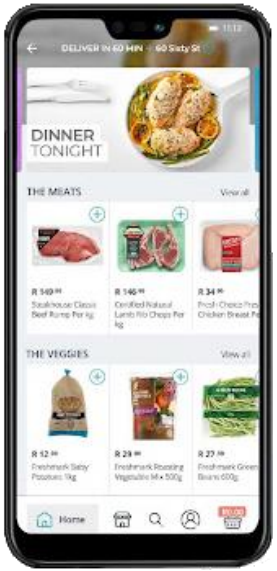
What is the Mobile Acceleration Framework

The Mobile Acceleration Framework is a ShopriteX framework that it is used to accelerate mobile development across the group.

Leveraging this framework allows development teams access to the group enterprise servers and development standards thus allowing teams to focus on the core features of their mobile apps.



Enterprise Customer Registration Authentication

Customer authentication, registration and consent leveraging the Group Customer repository (CIAM)

Enterprise Customer Communications

Leveraging the enterprise customer direct communications (Push notifications) to communicate effectively with the customer

Enterprise Basket and Payments

Leveraging the enterprise basket and Shoprite payment systems to facilitate safe seamless payment processes.

Enterprise Merchandising and Product Services

Leveraging the enterprise PIM and CMS to facilitate the merchandising of content on the site.

Shoprite Technology Standards

Apply Shoprite Technology Standards for development and usage of enterprise services

Shoprite Devops

Provide Shoprite Repositories and Build pipelines to accelerate and standardise development effort
